

Educational Apps, Play and Learn!

BTT's Parent Corner

APP Suggestion By: Yazmin Martinez

Young children can develop many skills through the power of play. Most apps are designed as a play base system, meaning the child is learning while playing at the same time.

The Apps will help develop language skills, emotions, problem-solving, and creativity. Toddlers are introduced to an educational curriculum but are given the freedom to learn at their own pace.

- **Khan Kids***-FREE
- **ABCmouse***- \$9.95/month or \$59.95/year
